RE: Letter of September 28, 1998

The small fuel spill was cleaned up and secondary containment of the fuel storage tank was done. This was completed on August 1st, 1998. The contaminated soil is stored in our Salt Lake yard in barrels pending instructions on disposal. We made a request on appropriate treatment or disposal and have not been answered as of this date. The contaminated soil is approximately one cubic yard.

The trash in question was picked up from the surface. It was hauled to garbage dumpsters located in Heber and Salt Lake. These dumpsters are dumped weekly in corresponding County Landfills.

In summary we have complied fully and timely with all of your requests to date. We are working diligently to comply with all directives.

Sincerely,

A handwritten signature in blue ink that reads "Lon Thomas". The signature is fluid and cursive, with a large loop at the end.

Lon Thomas
